

When Was The Annexation Of Hawaii

Understanding the Hawaiian Islands: A Pivotal Moment in American History

The question **when was the annexation of Hawaii** is more than a simple date on a calendar. It represents a transformative period for both the Hawaiian Islands and the United States, marking the end of a sovereign kingdom and the beginning of a new chapter in the Pacific. To understand this pivotal event, one must look beyond a single moment and explore the complex political, economic, and social forces that led to the formal incorporation of Hawaii into the United States. The official date is July 7, 1898, when President William McKinley signed the Newlands Resolution, but the journey to that date was long and deeply contested. This article will explore the timeline, the key players, and the lasting implications of this significant historical event.

The Precise Answer: When Was the Annexation of Hawaii?

The most direct answer to the question **when was the annexation of Hawaii** is July 7, 1898. On this day, the United States Congress passed the Newlands Resolution, a joint resolution that formally annexed the Republic of Hawaii as a U.S. territory. However, the actual transfer of sovereignty occurred a little over a month later. The formal ceremony marking the handover of power took place on August 12, 1898, at the Iolani Palace in Honolulu. During this ceremony, the flag of the Republic of Hawaii was lowered, and the Stars and Stripes were raised, officially incorporating the islands into the American fold.

It is important to note that this was not a voluntary merger between equal nations. The path to annexation was paved by political intrigue, economic pressure, and a controversial coup d'état that overthrew the Hawaiian monarchy five years earlier. Therefore, while the date itself is clear, the context surrounding it is essential for a complete understanding.

Before the Question: The Kingdom of Hawaii

To fully grasp **when was the annexation of Hawaii** and why it happened, one must first understand the nation that existed before. Hawaii was not a collection of undiscovered islands when Americans first arrived. It was a unified, sovereign kingdom recognized by major world powers, including the United States, Great Britain, and France.

- Unified Monarchy:** King Kamehameha I unified the Hawaiian Islands in 1810, establishing a single kingdom with a structured government and legal system.
- International Relations:** The kingdom engaged in international diplomacy, signed treaties, and maintained embassies abroad. The United States formally recognized Hawaiian independence in 1842.
- Economic Growth:** The Hawaiian economy thrived on sandalwood trading, whaling, and later, the sugar industry. American and European businessmen established large plantations on the islands.
- Constitutional Government:** By the late 19th century, Hawaii had a constitutional monarchy with a legislature, a supreme court, and a system of laws designed to protect its sovereignty.

The Hawaiian people, known as Kanaka Maoli, had their own rich culture, language, and traditions that had flourished for centuries before Western contact. The kingdom was a modern, independent state, not a primitive outpost waiting to be claimed.

The Overthrow: The Prelude to Annexation

The direct answer to **when was the annexation of Hawaii** cannot be separated from the events of 1893. The monarchy was overthrown in a coup d'état orchestrated by a small group of mostly American and European businessmen, many of whom were descendants of Protestant missionaries. These men, known as the "Committee of Safety," were motivated primarily by economic self-interest.

The Bayonet Constitution

In 1887, a previous group of businessmen had forced King Kalakaua to sign what became known as the "Bayonet Constitution." This document stripped the monarchy of much of its power and imposed voting rights based on wealth and race, effectively disenfranchising most Native Hawaiians and Asian immigrants while giving disproportionate power to wealthy white landowners.

Queen Liliuokalani's Stand

When King Kalakaua died in 1891, his sister, Queen Liliuokalani, ascended to the throne. She was a strong, intelligent leader who sought to restore power to the monarchy and the Hawaiian people. In January 1893, she attempted to promulgate a new constitution that would restore voting rights to Native Hawaiians and diminish the power of the wealthy oligarchy. This was the catalyst the opposition needed.

The Coup of 1893

In response to the Queen's actions, the Committee of Safety moved quickly. With the backing of John L. Stevens, the U.S. Minister to Hawaii, they called for a landing of U.S. Marines under the pretext of protecting American lives and property. The Marines landed on January 16, 1893, and the following day, the monarchy was declared overthrown. Queen Liliuokalani, yielding to the authority of the United States government to avoid bloodshed, surrendered under protest.

The Blount Report

President Grover Cleveland, who took office shortly after the coup, investigated the situation. The Blount Report, commissioned by Cleveland, concluded that the overthrow had been illegal and was carried out with the connivance of the U.S. Minister and the unauthorized use of American military force. Cleveland attempted to restore the monarchy, but the provisional government, now in control, refused to step down. The Queen was offered reinstatement only if she granted amnesty to the revolutionaries, which she initially refused, and the opportunity was lost.

The Republic of Hawaii: A Government in Waiting

After the failed attempt to restore the monarchy, the provisional government established the Republic of Hawaii on July 4, 1894, with Sanford B. Dole as its first and only president. The primary goal of this republic was to secure annexation to the United States. The leaders of the republic knew they could not maintain power indefinitely without the protection and integration offered by

becoming American territory.

For the next five years, the republic functioned as a de facto government, but its existence was precarious. It was propped up by the sugar trade and the tacit support of American diplomatic officials. The debate over **when was the annexation of Hawaii** would become a major political issue in the United States during this period.

The Role of the Spanish-American War

The most significant factor that finally answered the question of **when was the annexation of Hawaii** was the Spanish-American War in 1898. This conflict drastically shifted American public opinion and political priorities regarding the Pacific.

During the war, the strategic importance of Hawaii became undeniable. The islands served as a crucial coaling station and supply depot for American naval vessels traveling to the Philippines, another major theater of the war. Commodore George Dewey's decisive victory at the Battle of Manila Bay in May 1898 highlighted the need for a strong American naval presence in the Pacific, with Hawaii as a vital link.

Suddenly, the opposition to annexation that had stalled efforts for five years collapsed. The argument for national security and strategic necessity overrode previous concerns about imperialism and the illegal overthrow of a sovereign government. The question shifted from "should we?" to "we must."

The Newlands Resolution: The Final Step

With the political landscape transformed by war, Congress moved quickly. A joint resolution requires only a simple majority in both houses of Congress, unlike a treaty which requires a two-thirds majority in the Senate. This made it the preferred method for annexation.

The Newlands Resolution, named after Representative Francis G. Newlands of Nevada, was passed by the House on June 15, 1898, with a vote of 209 to 91. It passed the Senate on July 6, 1898, with a vote of 42 to 21. President McKinley signed it into law on July 7, 1898. This is the definitive answer to the question, **when was the annexation of Hawaii**.

Key Provisions of the Resolution

- Annexation of the Republic:** The resolution formally annexed the Republic of Hawaii and all its territorial possessions.
- Establishment of a Territorial Government:** It created the Territory of Hawaii, with all laws of the U.S. to apply. The existing laws of the republic were to remain in effect unless they conflicted with U.S. law.
- Public Lands:** All public lands, former crown lands, and government property of the Republic of Hawaii became the property of the United States.
- Debt Assumption:** The United States assumed the debt of the Republic of Hawaii, which was estimated at around \$4 million.
- Citizenship:** All citizens of the Republic of Hawaii who were citizens at the time of annexation automatically became citizens of the United States.

The Formal Transfer: August 12, 1898

While the legal date for **when was the annexation of Hawaii** is July 7, the emotional and symbolic date is August 12, 1898. On this day, a formal ceremony was held on the steps of Iolani Palace in Honolulu. Queen Liliuokalani was not present; she remained in her private home, Iolani Palace having been turned into a government building. The ceremony was brief. The Hawaiian flag was lowered, and the American flag was raised, accompanied by a 21-gun salute. Prince Kuhio, the nephew of the Queen, reportedly stepped forward to address the crowd, but many accounts state that the ceremony was quiet and somber for many Native Hawaiians who witnessed the end of their monarchy.

The Legacy and Aftermath

Understanding **when was the annexation of Hawaii** is only the beginning of understanding its legacy. The annexation had profound and lasting consequences.

- Loss of Sovereignty:** The Kingdom of Hawaii was permanently extinguished. The Native Hawaiian people lost their independent nation and were subjected to a legal system that did not recognize their prior sovereignty.
- Economic Transformation:** Annexation solidified the power of the sugar oligarchy. The islands' economy became even more deeply integrated into and dependent on the United States, with the plantation system continuing for decades.
- Cultural Suppression:** The Hawaiian language was banned from schools, and traditional cultural practices were discouraged or suppressed. This led to a significant decline in the number of native speakers and the practice of traditional arts.
- Strategic Importance:** Hawaii became a critical military outpost for the United States, culminating in the attack on Pearl Harbor in 1941 and its role as a staging ground for the Pacific theater of World War II.
- Statehood:** The question of **when was the annexation of Hawaii** eventually led to its statehood. On August 21, 1959, Hawaii became the 50th state of the Union, a status that remains a source of pride for many but also a point of contention for those who believe the annexation was illegal.
- The Sovereignty Movement:** Today, a vibrant and active Hawaiian sovereignty movement exists. Many Native Hawaiians argue that the annexation was a violation of international law and that they have a right to self-determination and the restoration of their independent nation.

Conclusion

To answer the question **when was the annexation of Hawaii** requires more than a single date. It is a story of a thriving kingdom, a controversial overthrow, a strategic war, and a complex political process. While the official date is July 7, 1898, with the signing of the Newlands Resolution, the events that made that date possible began years earlier and their consequences are still felt today. The annexation of Hawaii transformed the Pacific, reshaped American power, and left a lasting, deeply nuanced legacy for the people of the islands. Understanding this history is essential to understanding both the United
