Mastering the Basic Shapes Behind Every Emoji

Every emoji, no matter how complex, is built from a few simple geometric shapes. If you want to truly understand **how to draw emojis step by step easy**, you must first practice these foundational forms.

The Perfect Circle

Most emoji faces are based on a circle. To draw a smooth circle, try using a compass or simply trace around a round object like a cup or a roll of tape. If you are freehanding it, draw a square first and then round off the corners. Light, feathery strokes are better than heavy lines at this stage.

The Oval and the Teardrop

Hearts, eyes, and certain expressions use ovals and teardrop shapes. Practice drawing these by making small loops. For a teardrop, start with a dot at the top and draw a curve down into a point.

Straight and Curved Lines

Simple lines form mouths, eyebrows, and arms. Drawing a straight line

can be tricky, so go slowly. Curved lines, like a smile or a frown, require a smooth, continuous motion from your wrist. Mastering these basics is the secret to learning **how to draw emojis step by step easy** because you will see the same shapes repeated in different emojis.

Step-by-Step Tutorial: How To Draw The Classic Smiling Face

Let us start with the most iconic emoji of all. This is the perfect first project for anyone learning **how to draw emojis step by step easy**.

1. **Draw the circle:** Lightly sketch a large circle in the center of your paper. Make it as round as possible.
2. **Add the eyes:** Draw two small, solid black ovals inside the circle. Place them evenly apart, roughly in the upper half of the face.
3. **Create the smile:** Under the eyes, draw a wide, upward-curving line. This is the smile. Start from one side of the face and curve it gently down and then up to the other side.
4. **Add the tongue (optional):** For a classic happy emoji, add a small pink or red oval shape inside the smile, touching the bottom curve.
5. **Outline and color:** Trace your pencil lines with a black pen. Let the ink dry, then erase the pencil marks. Color the entire face bright yellow, except for the eyes and mouth.

Practice this simple design a few times. Once you feel comfortable, you have unlocked the most important step in learning **how to draw emojis step by step easy**.

How To Draw The Poop Emoji Step By Step

Yes, it is silly, but the poop emoji is incredibly popular and surprisingly fun to draw. It also moves away from the circle shape, which is a useful skill.

1. **Start with the top swirl:** Draw a small, curly spiral at the top of your paper. Think of it like soft serve ice cream.
2. **Draw the main body:** Below the swirl, draw a wide, rounded shape that tapers at the bottom. It should look like a soft, organic blob. Do not make it perfectly symmetrical; a little unevenness makes it look more natural.
3. **Add the eyes:** Draw two cute, round eyes in the middle of the body. Add tiny white highlights inside the eyes to make them look glossy.
4. **Draw the mouth:** A simple, slightly wavy smile works best. You can add a small tongue if you like.
5. **Color it brown:** Use a medium to dark brown. Add a slightly lighter brown highlight on one side to give it a 3D effect.

How To Draw The Heart Emoji

The simple red heart is a fundamental emoji. Mastering it is essential for anyone interested in **how to draw emojis step by step easy**.

2. **Create the point:** From the bottom of each bump, draw a curved line that slopes inward, meeting at a sharp point at the

bottom center.

3. **Smooth the curves:** The lines should flow naturally from top to bottom without any sharp angles.
4. **Color it red:** Fill the entire shape with a bright red. Add a small white highlight on the upper left bump for a shiny look.

This is a simple but elegant drawing that reinforces symmetry and curve control.

Common Mistakes Beginners Make And How To Avoid Them

When you are just starting out with **how to draw emojis step by step easy**, a few common pitfalls can frustrate you. Here is how to avoid them.

- **Uneven eyes:** One eye is higher or bigger than the other. Solution: Lightly draw a horizontal line across the face to mark where the eyes should sit. Use that line as a guide.
- **Wobbly lines:** Your circles are not round or your lines shake. Solution: Draw quickly and confidently with your whole arm, not just your wrist. Practice drawing circles by making repeated loops.
- **Smudging:** Your pencil marks smudge your colors. Solution: Use a harder pencil (like an H or HB) and place a clean sheet of paper under your drawing hand. Always ink before you color.
- **Too much pressure:** You press too hard with your pencil, leaving deep grooves. Solution: Use light, gentle strokes. You should barely see the pencil line. This makes erasing much easier.

Understanding these mistakes early on will accelerate your progress in **how to draw emojis step by step easy**.
